Definitions

Annual: A plant that completes its entire life cycle from seed germination to seed production in one season in our zone.

Appropriateness of all Components: The plants used are environmentally suited and have similar cultural requirements.

Artistic Concept: Selection and organization of all components in the display. Appropriateness of components and their placement for design type if applicable.

Bulb/Tuber/Corm: A thickened bud with fleshy scales, usually growing below ground, as in onion, narcissus, tulip; or with narrow separate scales as in the lily.

Color: Degree of clarity, brightness and freshness of foliage, flowers, and stems.

Color Harmony: A pleasing combination of colors.

Collection: A collection consists of three flowers, one blossom on each stem: (1) three flowers, one of each different variety or (2) three flowers of the same variety but three distinctly different colors.

Condition: Healthy, blemish free (e.g. damage due to insects, disease, physiological, mechanical problems); neither immature nor past prime.

Conformity to Rules: Complies with all rules (overall rules and rules for its class).

Creativity: An original concept in the selection and organization of all components. This can apply to the choice of materials or the manner of usage.

Cultural Perfection: The quality compared to the standard for a variety in terms of criteria such as color, form, substance & texture, size, etc.

Design: Design Principles (Balance, Contrast, Dominance, Proportion, Scale, Rhythm (each awarded seven points) are applied to the Design Elements (Line, Form, Color, Texture, Pattern, Size, Space, Light).

Distinction: Superiority in all respects. Exceptionally fine design negates minor faults. Moderate to major faults negatively affect Distinction. Degree of distinction is evident in craftsmanship, use of mechanics, and condition of all components.

Expression: Interpretation of class title or theme through the component/s or design element/s.

Floriferousness: The abundance of flowers on an entire plant; a proportionate number of blooms for the size of the specimen.

Foliage: Amount according to type, proportional to stem, positioning on stem, if applicable.

Form: Balanced, appropriate to type; flowers & foliage balanced for flowering specimens. This applies to contour of individual parts or components as well as to the contour of whole plant or design.

Grooming: This applies to all preparations that the exhibitor can control such as stem length, clean cut, foliage removed below water level, cleanliness, insects and presentation. No salt residue on potted plants.

Harmony: A consistent, orderly, or pleasing arrangement of parts.

Invasive A plant that is both non-native and able to establish on many sites, grow quickly, and spread to the point of disrupting plant communities or ecosystems.

Native: A plant that occurs naturally in our region without direct or indirect human intervention.

Perennial: A plant which lives for three or more years and after reaching maturity typically produces flowers and seeds each year. Perennials are classified as herbaceous if the top dies to the ground each winter, and as woody if the top persists as in shrubs and trees.

Plant Identification: A legible identification of genus, species, and cultivar, as appropriate

Rarity: Significant difference from other entries in its uniqueness and singularity.

Size: Ideal for type, average or slightly above.

Stem: May consist of multiple flowers

Substance: Tissue structure, firmness or thickness.
